

DSWP Dragon Seal

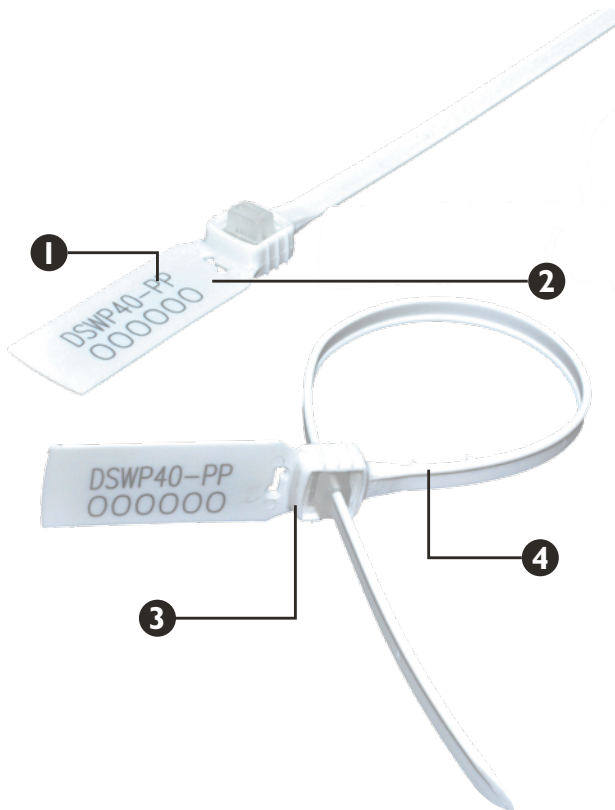

MEGA FORTRIS
NEW ZEALAND

The DSWP Seal is a strong yet indicative Polypropylene smooth pull security seal, secured by way of a metal locking insert.

The user-friendly DSWP seal is designed for optimal tamper-evidence and has a large flag area for clear laser printing and seal colour identification. This is one of the most practical bag seals on the market for high-security applications.

Also widely used for airline cargo, bank and postal services roll-cages, clinical waste management, courier services, cash-in-transit, warehouses, tote-boxes and other applications requiring high pull strength. Better security with innovative use of materials and industrial design.

FEATURES

- 1 The DSWP seal allows permanent laser marking to be etched on. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 2 The large flag area allows ample space for added information such as bar-coding and ease of identification.
- 3 The DSWP seal has a unique stainless steel locking plate that strengthens the locking chamber and provides high tamper-evidence.
- 4 The DSWP is a very user-friendly strong and durable seal designed specifically to secure bags and sacks, with embedded spikes to provide a better grip on bags and other slippery materials.

SPECIFICATIONS

Material	Polypropylene (food grade)
Locking Length	35cm
Strap Dimensions	2.5mm x 8mm
Pull Strength	45+kg
Marking Area	20mm x 50mm
Marking Digits	Max 15
